## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 19-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no antecedent basis for "openings". Only one opening is recited in the parent claim.

### *Claim Rejections - 35 USC § 102*

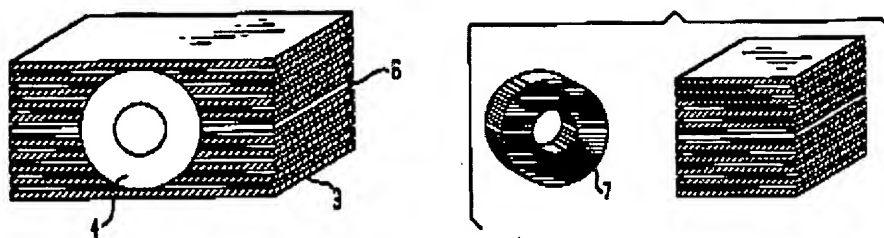

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Gordon et al.

[6162311].

Gordon discloses a monolithic composite core having first and second core structure separated by insulating layer 6; each structure comprising ferrite layers and ceramic [non-magnetic material] stacked in layers; an opening extending there through for passage of a conductive element [figures 5A,5C; column 4, lines 37-to column 5, line 10; column 1, lines 55-60; claims 1 and 5].

With respect to claim 16, the insulating layer 6 is parallel to the magnetic layers of the core structure as shown in figure 5A.

With respect to claim 17, the insulating layer 6 is perpendicular to the magnetic layers of the core structure as shown in figure 6 and column 5, lines 10-12.

#### *Allowable Subject Matter*

4. Claims 1-14 are allowed.
5. Claims 18-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claims 19-20 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claim 1 recites inter alia, *a conductive element establishing a conductive path through said first opening, wherein said at least one non-magnetic layer separates said conductive elements from one of the magnetic layers.*

Claim 18 recites inter alia, *at least one nonmagnetic layer of each of said first and second core structures defining one side of the opening for each respective first and second core structures.*

Art Unit: 2832

Claim 19 recites inter alia, *at least one nonmagnetic layer of each of said first and second core structures comprises a pair of nonmagnetic layers, said pair of nonmagnetic layers defining opposite sides of said opening for each respective first core structure and said second core structure.*

Claim 20 recites inter alia, *at least one of nonmagnetic layer of said first and second core structures separates said conductive element from one of the magnetic layers.*

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

#### ***Response to Arguments***

7. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
